

Powermesh Garage Door Controller

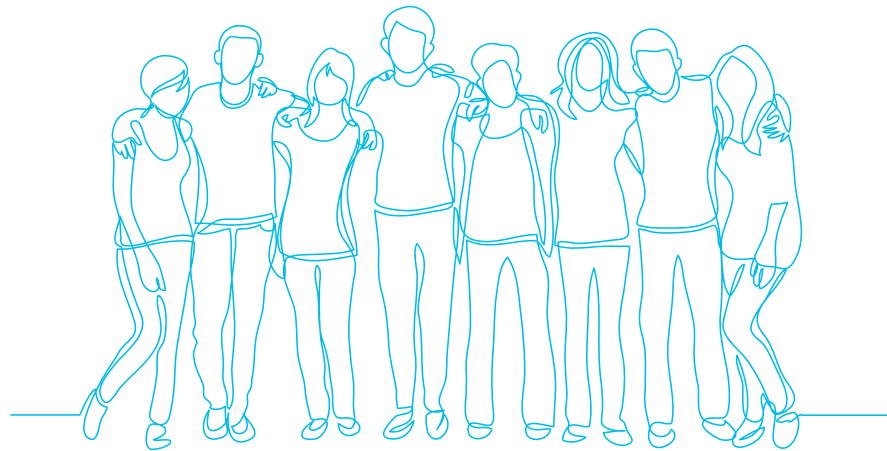

Control your door and more
with Powermesh in your home.

The garage door more Australians come home to every day.

With a reputation built on reliability and safety we present the latest innovation in garage door technology.

Don't just open your garage door, open it in new ways never before possible.

Our garage doors are chosen by Australia's leading residential builders for superior quality and value.

Control your door like never before.

Door Controller & Sensor

Zimi Cloud Connect

zimi

The app to control it all.

The Powermesh Garage Door controller gives you complete control in the palm of your hand. Enjoy the convenience of connecting your garage today and expand control for everything else tomorrow.

Learn more about the Zimi ecosystem.
www.zimi.life

We strongly recommend the use of a Photo Electric Beam with your Powermesh Garage Door Controller. A Photo Electric Beam is designed to detect an obstruction while the door closes and sends a signal to the opener to reverse or stop the door movement. If you do not already have Photo Electric Beams installed, please contact your local Steel-Line branch for a quotation to have them installed.
